

Brick Excellence

www.thebrickstore.in

About us

India's leading producer and exporter of facing bricks.

Who we are?

In 1986, it began with an intent to produce exceptional structural bricks for the Indian market. The quality and characteristics of bricks were greatly appreciated by architects and engineers. Interestingly, the construction fraternity experienced that JJB bricks were not only good as structural bricks but even better when used as facing bricks, given the appealing aesthetics and high quality. It led to the transformation of a small brickfield to emerge as India's largest manufacturer and exporter of clay facing products. Today, Jay Jalaram Brick Works presents India's widest range of clay Facing Bricks with 210+ brick variants of international quality in hundreds of shades, textures and formats.

Innovation meets Automation

We have focused on creating sustainable products that are produced in the most efficient way to have minimum impact on the environment without compromising on superior quality for buildings of the future. Our brick factory has advanced its manufacturing capabilities by equipment upgradation and automation. We take pride in being one of the first in the country to install the European extrusion line, drying chambers and world's most versatile hand simulated soft mud line. The sophisticated preparation systems with state-of-the-art recipe management systems have made Jay Jalaram Brick Works an innovative leader in clay brick manufacturing.

CERATEC Belgium (Technology and Engineering Partner)

Brick Impressions

In the last 3 decades we have helped turn ideas and blueprints into welcoming classics that are appealing yet functional expressions of individuality. Our bricks have won the hearts of architects around the country and the world, time and again from IIM-Ahmedabad to hundreds of other architectural marvels that are bound to last a lifetime. JJB bricks have successfully added timelessness to the facades.

International Presence

Our passion for creating a world-class product was rewarded when our quality was graciously appreciated by the international market. We have a strong presence in Europe, Oceania and GCC. Today we proudly export to almost 46 countries and counting. We continue to work relentlessly and passionately to cater high quality clay products all around the globe and give the market one of the best bricks that they have been desiring.

Traditional

A range of genuinely handcrafted bricks, manufactured using the traditional technique of brick making. The hand moulded earthen textures of the bricks brings a dynamic character and subtle shade variance to the façade.

Linear

With their peculiar dimensions - the length of more than ordinary bricks but only 50 mm high, Linear bricks create a rustic and sophisticated look. Linear bricks provide a more intricate appearance with the traditionally beautiful material yet maintaining the rich texture and color contrast expected from a brick masonry façade.

Brick Complements

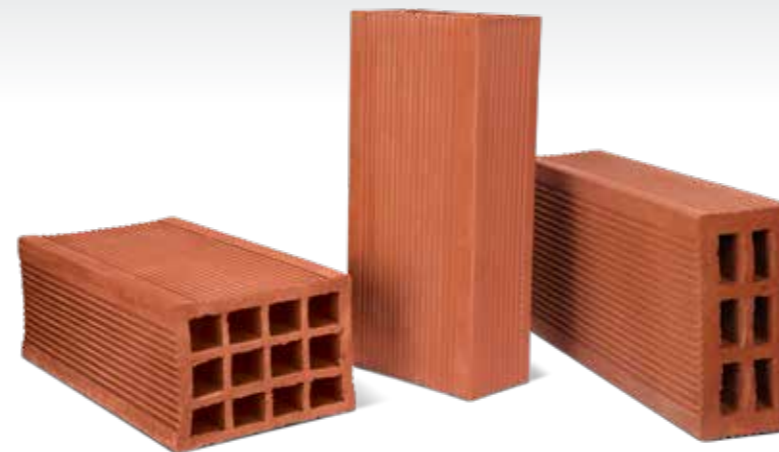

Flooring Bricks

Well-known for their exceptional strength and earthy looks, flooring bricks bring warmth and hospitality to any landscape. With flexibility in designing and colors that never fade, clay flooring bricks allow you to bring a traditional, rustic & contemporary look to the balcony, driveway or porch in your style.

Façade Jalis

When used within the internal or external façade, Jali enchants a class of its own and looks versatile. Jali connects the interior to the external world glamorously creating a 'WOW' effect!

Clay Blocks

Our clay blocks are useful for construction (hollow block) and roofing purposes. Clay Block is the gift of modern heavy clay technology for contemporary construction needs. This revolutionary building material ensures builders are fast on construction and low on cost and top on quality.

Custom-made Bricks

The most remarkable projects are a result of out-of-the-box thinking by the designers. The modern mass manufacturing processes often make it difficult to manufacture products of customized nature. This is where we stand out in manufacturing products of customized nature with our hallmark quality and consistency.

Brick by Chance

Brick by Chance is a group of extraordinary and unique products that were produced during the R & D process. Unlike any other brick in the market, Brick by Chance is an unique opportunity for brick lovers to use bricks which give a distinctive and ever-lasting charm.

Note:

1. Products are available in Brick variants and Cladding variants.
2. Being a natural product, clay brick is bound to have minor variations in shade, texture and sizes, these variations are the character of facing bricks and not to be seen as a problem. Colors and textures of the actual product may differ from this brochure due to the photographic and printing limitations. We recommend you to make the final selection of bricks at our nearest showrooms in physical form.
3. Please scan the QR code on page 20 to know the brick specification.

THE
BRICK
STORE

It's all about bricks

The Brick Store-TBS is one of the latest initiatives by Jay Jalaram Bricks Works to change the way bricks are seen and sold in India. Spread across the country, The Brick Stores is the place for brick lovers to experience an International range of clay facing bricks offered by JJB. The Brick Store is an experience center with the soul of an art gallery. The store presents a unique opportunity for brick enthusiasts and designers to experience this beautiful creation in innumerable ways that are sure to stimulate their minds.

Our Services

Baroda Museum and Picture Gallery

Design without limits...

Brick Matching

Our brick matching solution will help you to preserve a quality brickwork appearance while renovating, expanding or restoring a project. JJB's expert team will not only help you determine the existing brickwork but also help you to find the correct textures, sizes and colours to bring the authentic look.

Custom Blending and Weathering

Our bricks offer you an abundance of textures to choose from. Be it a weathered look, or a blend that you wish to create, our wide range is sure to assist you in the specific blend you are looking for your project. Handpicked personalised blends are the desired option for designers to build a distinctive building.

Custom Brick making

This is your opportunity to lay your signature on the timeline of the planet, come let's build it together.

You design it, we make it!

Renovation, Restoration, Extension and Conservation

As specialists in the manufacture of traditional building material, we offer expert advice and guidance to perfectly match existing brickwork. Our extensive product range of bricks along with a unique character and aesthetic, enable us to provide suitable solutions for conservation projects around the world.
